Description | Editorial | Solutions | Submissions

1281. Subtract the Product and Sum of Digits of an Integer

Easy | Topics | Companies | Hint

Given an integer number `n`, return the difference between the product of its digits and the sum of its digits.

Example 1:

```
Input: n = 234
Output: 15
Explanation:
Product of digits = 2 * 3 * 4 = 24
Sum of digits = 2 + 3 + 4 = 9
Result = 24 - 9 = 15
```

Example 2:

```
Input: n = 4421
Output: 21
Explanation:
Product of digits = 4 * 4 * 2 * 1 = 32
Sum of digits = 4 + 4 + 2 + 1 = 11
Result = 32 - 11 = 21
```

Constraints:

- 1 <= n <= 10^5

2.9K | 94 | 9 Online

Code

Java | Auto

```java
class Solution {
    public int subtractProductAndSum(int n) {
        int count=0,t=n;
        while(t!=0){
            count++;
            t=t/10;
        }
        t=n;
        int product=1,sum=0,pv=(int)Math.pow(10,count-1);
        while(t!=0){
            int digit=t/pv;
            product*=digit;
            t=t%pv;
            pv=pv/10;
        }
        pv=(int)Math.pow(10,count-1);
        while(n!=0){
            int digit=n/pv;
            sum+=digit;
            n=n%pv;
            pv=pv/10;
        }
        return product-sum;
    }
}
```
